Art Unit: 1656

The application has been amended as requested in the communication filed May 4, 2004. Accordingly, claim 29 has been canceled.

Claims 1-28 are pending and under consideration.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I-XXVI	Claims 1-28, drawn to a catalytic domain of non-insulin receptor protein kinase and crystal thereof, classified in class 435, subclass 194.
--------------	---

The inventions are distinct, each from the other because of the following reasons:

The polypeptides of Groups I-XXVI and listed in claims 4 and 5, and claims 21 and 22 are independent chemical entities and require different literature searches in the patent and non-patent literature.

Applicants are required to elect one protein for prosecution. This is not a species election.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nashaat T. Nashed, Ph. D. whose telephone number is 571-272-0934. The examiner can normally be reached on MTWTF.
